

# Engineered Agricultural Nutrient Management System

## Slurrystore® Testimonial

### 106'x33' Slurrystore® holds over 2,000,000 gallons.

Congratulations to Teabow, Inc. of Walkersville, MD on the erection of their second Slurrystore, holding over 2,000,000 gallons, at their dairy with 2,200 head of cows, heifers and young stock.

The Stups bed their dairy herd with sand. Gravity transports the sand laden nutrients to a reception pit where the sand settles out; the liquid is then pumped to their Slurrystore.

Teabow's first Slurrystore was erected for dry cows and heifers in 2003. When they needed additional storage, they looked at their 11-year-old tank and it looked nearly new! They like the simple, excellent agitation system that just works.

**Installing Dealer:** Penn Jersey Products, Inc. Authorized Slurrystore and Harvestore Sales and Services Since 1964.

Teabow's 62' x 19' Slurrystore built in 2003 and still in use.

Jim Stup, right, and son Adam of Teabow, Inc. and their new 106' x 33' Slurrystore.
